

Daniel Sperry | remote web developer

503.724.1893 | me@dsperry.com

webpack/ES6, Ruby, AWS, TDD, UX, React & Angular

EXPERIENCE

7/2016 - present *Grolar LLC*, **FOUNDER** - *Remote*

- Developed website that integrates with POS system API for updated web results of sale items
- Developed website with multipage ReactJS website with React Router and Webpack. Styles done with css-modules.

3/2015 - 12/2016 *Metova Inc*, **FULL STACK DEVELOPER** - *Remote*

- Web Developer/Project Lead on 1-2 person teams with 2 - 4 month retainers usually. One year long contract with AngularJS on a team of 10 developers.
 - Continuous Deployment on AWS.
 - Agile story points, daily scrum meetings and weekly iteration meetings
- Part of a 10 person front-end development team for a multi-million user AngularJS app
 - We increased JS test coverage from 15% to 75%
 - We upgraded from Angular 1.2-1.5
 - We added Windows native app with WinJS with mostly shared code base
- Project Lead/Scrum master on 2 projects with 2-3 developers.

11/2014 - 2/2015 *FINE Design Group*, **RAILS DEVELOPER** - *Portland, OR*

- Developed internally used rails engine as a gem that laid out the foundation of the work for a CMS's framework to build new projects quicker.
- Added test suite to Rails 3 legacy e-comm app
- Promoted to mid level developer and helped junior developers.

SIDE PROJECTS

- I've been getting Rails and React integrated so that I can use ReactJS and ReactRouter v4
- Updated Rails 5 generators to include better defined REST resource generators for API development that create files that are mostly test complete and document ready from generation.
- At FINE I made time to contribute to OSS, at Metova I helped maintain their suite of internally used gems

EDUCATION

2013 Code Fellows iOS

8 week iOS bootcamp based in Seattle, WA.

2012 - 2013 Self taught

HTML/CSS and Ruby on Rails using online resources.
