CAREER OVERVIEW

Software Developer with 4 years of experience writing **Rails** applications. Loves **Ruby**. Experience with **JavaScript, Swift, C, PHP**, along with libraries and frameworks associated with them.

I'm experienced in **full-stack development**. Including setting up the server with capistrano, application architecture with rails, and user facing design implementations with **component based HTML** and **CSS**. My favorite books that I read every year are *POODR* and *JS The Right Way*. I've spent most of the last 4 years learning how to write **concise Ruby** and I find I have **more interest in application design/architecture** these days.

EXPERIENCE

OSS: **Gem creator** of [PlaceBear Gem](#) and old **maintainer** for [Judge Gem](#).

Grower's Outlet

GrolarLLC website - South Bend, WA

- Developed a brand website for a friend's business. I was free to choose the design, development process, deployment platform, as well as the content.
 - The menu is integrated with a JS file from the POS maintainers.
 - The code was already on Github, so I chose to just host the site on **Github Pages** for **free** using **Jekyll**.
 - I used **gulp** so that I can use **babel** and **scss**.

Metova Inc.

Rails Developer - remote

- Helped build out new features for web portal and the JSON API of an exercise app that connects to exercise equipment at the client's facility. [**rails-admin, devise, active_model_serializers**]
- built MPV web app and API for a video recording and video merging app [**FFMPEG, refile, AWS EC2/S3/Route53/cloudfront**]
- set up SSO provider for Yale's family of smart home apps. Built digital door view web app and API [**CASino, active_model_serializers**]
- Refactored 2 year old Angular 1.2 for major music company [**learned Angular**]
- Refactored 4 year old Rails app that had low test coverage and a lot of bugs.[**code architecture and reorganization**]

FINE Design Group

Rails Developer - Portland, OR

- Streamlined 3 separate tasks into modularized processes/gems in order to develop at 10x
- Helped build Rails Engine as a gem that streamlined our process for building CMS's
- Built back-end for www.sevenfallscellars.com
- Added automated test suite to Rails 3.2 legacy ecommerce app
- Took over majority of bug fixes and feature updates for long standing client with 30+ apps

EDUCATION AND TRAINING

2013 Code Fellows iOS

Completed an 8 week long intense introduction to iOS course. I learned Objective-C and submitted an app to the app store in just 4 weeks. Also worked on a group project gaining experience in agile strategies and source code collaboration
