Daniel Sperry | remote **web developer**

503.724.1893 | danny.sperry@gmail.com

webpack/ES6, **Ruby**, AWS, **TDD**, UX, React & **Angular**

EXPERIENCE

7/2016 - present *Grolar LLC,* **FOUNDER** - *Remote*
- Developed website that integrates with POS system API for updated web results of sale items
- Front-end development using integration plugin with ES6 and webpack. Styles use inverted triangle CSS(ITCSS) style structure
- Related to side projects: I'm developing a full featured traceability API so that I can research React Native and IoT technology like RFID scanners, programmable door locks, and cash register.

3/2015 - 12/2016 *Metova Inc,* **FULL STACK DEVELOPER** - *Remote*
- Developer/Project Manager on 1-2 person teams with 2 - 4 month retainers
    - Continuous Deployment on AWS EC2, S3, and other needed services.
    - Agile story points, daily scrum meetings and weekly iteration meetings
    - 75% of the retainers I worked on ended up re-signed with future contracts.
- Part of a 10 person front-end development team for a multi-million user AngularJS app
    - We increased JS test coverage from 15% to 75%
    - We upgraded from Angular 1.2-1.5
    - We added Windows native app with WinJS with mostly shared code base
- Scrum master on 2 projects after a year

11/2014 - 2/2015 *FINE Design Group,* **RAILS DEVELOPER** - *Portland, OR*
- Developed internally used rails engine as a gem that started the companies streamlined process for building CMS's quicker
- Added test suite to Rails 3 legacy e-comm app
- Promoted out of Junior title

SIDE PROJECTS

- Founded and developed a database to manage WA seed-to-sale traceability API.
    - Full stack development using Ruby on Rails API with RSpec tests and Document Driven Development(DDD) API design using rspec_api_documentation gem.
- At FINE I made time to contribute to OSS, at Metova I helped maintain their suite of internally used gems

EDUCATION

2013 Code Fellows iOS
        8 week iOS bootcamp based in Seattle, WA.
2006 - 2013 Self taught
        HTML/CSS and Ruby on Rails using online resources.
